

## Do you think a visit to the veterinarian is all about the shots?

Vaccinations provide important protection for your dog. But, in addition to the vaccines that control viruses and bacterial diseases, regular visits assure early detection of other illnesses that can be even more important in extending your dog's life. Dogs age much faster than people do, so it is very important that we consider how fast they age and schedule physical examinations regularly so we are able to detect any problems in the early stages when cure or reversal is most successful. If signs become obvious, it may be too late to correct health problems.

### Meet Dr. Peter Jackson

Dr. Jackson joined the Air Force after high school, and was a Security Police K-9 handler stationed in the Philippines. He is a certified narcotics detection dog handler and an explosives dog handler. He has been stationed at Andrews Air Force Base outside Washington D.C. and has guarded Presidents Carter and Reagan along with dignitaries from many different countries including Prince Charles, Menachim Begin, Anwar Sadat and Pope John Paul. Previously, he owned the Pet Hospital of Newaygo, and upon moving to the lakeshore, he started Animal Medical Center in 2004. He practices general medicine and surgery. He is a member of the American Veterinary Medical Association (AVMA), the Michigan Veterinary Medical Association (MVMA) and the West Michigan Veterinary Medical Association. His wife's name is Laura. They have three children and share their house with three cats and three dogs.

#### Our Goal:

To offer thorough, compassionate and advanced care for pets, and guide you in making pet health care decisions that are right for your family.

#### Office Hours:

|           |     |      |

**Exceptional Care for Exceptional Pets**

# Lifetime Care programs for all dogs...

The professionals at Lifetime Veterinary Care are committed to your dog's health and well-being. We want only the very best for your dog, and that's why we offer preventive care plans to ensure overall health. Ask our doctor which program is best for you and your companion.

## Our Philosophy...

Dogs have different health care needs at different stages of life. A regular physical examination is the cornerstone of a healthy and happy pet. All of our Lifetime Care programs come with unlimited office calls because you should never have to question whether your pet should see our doctor. We want to remove any barriers that would keep your pet from receiving the care it deserves. The earlier we detect a problem, the better we can treat it.

## Our Programs...

### Companion Program:

Geared for younger dogs where health concerns are typically minimal. Six month exam intervals, along with parasite detection, proper vaccinations and diagnostics make this a great plan for indoor dogs.

### Great Outdoors Program:

Designed for outdoor or sporting dogs with exposure to ticks and other parasites. Six month exam intervals, proper vaccinations including Lyme Disease with twice yearly fecal exams make this ideal for all outdoor dogs.

### Plus Program:

This is geared for middle aged and older dogs or in any dog where there are health concerns. Six month exam intervals, along with parasite detection, proper vaccinations, diagnostics and the addition of a Complete Blood Count and Blood Chemistry Profile help us stay ahead of potential health problems.

### Complete Program:

This program is for dogs that need to have their teeth cleaned. It is the same as the Plus plan with the addition of a dental cleaning. It is our most comprehensive program.

For more information on our programs, please call our office at 616-837-0700

|   | Great Outdoors Companion | Great Outdoors | Complete Plus | Complete |
