

Do you think a visit to the veterinarian is all about the shots?

Vaccinations provide important protection for your puppy. But, in addition to the vaccines that control viruses and bacterial diseases, regular visits assure early detection of other illnesses that can be even more important in extending your pet's life. Dogs age much faster than people do, so it is very important that we consider how fast they age and schedule physical examinations regularly so we are able to detect any problems in the early stages when cure or reversal is most successful. If signs become obvious, it may be too late to correct health problems.

Meet Dr. Peter Jackson

Dr. Jackson joined the Air Force after high school, and was a Security Police K-9 handler stationed in the Philippines. He is a certified narcotics detection dog handler and a certified explosives detection dog handler. He has been stationed at Andrews Air Force Base outside Washington D.C. and has guarded Presidents Carter and Reagan along with dignitaries from many different countries including Prince Charles, Menachim Begin, Anwar Sadat and Pope John Paul. Previously, he owned the Pet Hospital of Newaygo, and upon moving to the lakeshore, he started Animal Medical Center in 2004. He practices general medicine and surgery. He is a member of the American Veterinary Medical Association (AVMA), the Michigan Veterinary Medical Association (MVMA) and the West Michigan Veterinary Medical Association. His wife's name is Laura, they have three children, Lee, Kelsi and Dale, and share their house with three cats and three dogs.

Our Goal:

To offer thorough, compassionate and advanced health care for pets, and guide you in making pet health care decisions that are right for your family.

Exceptional Care for Exceptional Pets

Lifetime Care Programs for your puppy...

The professionals at Lifetime Veterinary Care are committed to your puppy's health and well-being. We want only the very best for your puppy and that's why we offer preventive care programs to ensure overall health. Ask our doctor which program is best for you and your puppy.

Our philosophy...

Taking care of your puppy's physical health is only half of what we do. We are here to answer all of your questions, and to educate you to be the pet owner you want to be. We are your health care team to help you prevent both medical problems and behavioral issues.

Our Lifetime Care programs come with unlimited office calls because you should never have to question whether or your pet should see our doctor. We want to remove any barriers that would keep your pet from receiving the care it deserves. The earlier we detect a problem, the better we can treat it.

Our programs...

Puppy Companion

This program consists of four monthly visits: each visit your puppy will be vaccinated, a stool sample checked, wormed for round and hookworms, and a heartworm pill dispensed. We'll also check the progress of housetraining and help prevent any behavioral issues before they start. This program also includes a heartworm test, a urinalysis, along with consults on nutrition and behavior, and unlimited office calls during regular business hours.

Puppy Complete

Our most complete health program for puppies. This program is the same program as our Puppy Companion Program but also includes a spay or neuter for your puppy, and Surgery Safety package that includes IV fluids and blood tests along with post surgical pain control. This the highest level of care available for your puppy.

For more information on our programs, please call our office at 616-837-0700
